Questions/Answers		

(12 people
present)

Discharge from Camp Allen - rusty water
(Sheller - Globe) cork and go home

INSTALLATION RESTORATION PROGRAM BACKGROUND

1. Laws and Regulations

a. Current Disposal Practices

Regulated by Commonwealth of Virginia

Hazardous Waste disposed off-site at Environmental Protection Agency (EPA) permitted facilities

b. Cleanup at Former Disposal Sites

DoD must meet EPA requirements

Public participation required

Technical Review Committee meetings
Comments solicited on remediation methods

Funding set up by Congress for DoD sites

2. Naval Base, Norfolk Program Status

a. First study complete 1983

Used literature search, field inspections, personnel interviews and aerial photographs

Identified sites where disposal had occurred

Recommended 6 sites for further study; however, these sites posed no immediate threat to human health or the natural environment

Two sites later added for study - buildings V-60/V-90 and building LP-20

b. Second study complete 1988 focused on six sites

Evaluated extent of contamination

Ground water, surface water and soil samples collected and analyzed for hazardous and toxic substances

To date, 3 rounds of sampling and analysis have been conducted

c. Studies being conducted to obtain current data on contamination and assess human health risk

• Did Navy ever own this property?
• { FMAE - precursor to SMA
• { Subtendence - disposal in Compartment?
• Pulling out drums @ Area B?

2/9/90
Usage?
